

DE-05 CENTRIFUGAL MOLD WASH FOR GENERAL PURPOSE

A universal mold wash for both Horizontal and Vertical axis centrifugal molds with temperature application from 375-450° F [191-232°C] using the “Hot Mold / Wet Wash” method of application. Manufactured from fine mesh flour, when applied properly will adhere to the casting surface and will only leave residue in the mold bore. Shipped in lined metal and plastic containers in various sizes.

[Diatomaceous Earth](#) (DE) is a substance made up of the fossilized remains of plankton; it looks like an off-white talc powder and has exceptional high thermal resistance and non-toxic. Amorphous diatomaceous earth has not been associated with any cancers in people making it ideal for foundry use. With average surface texture of an orange peel and proper thickness application, mold life can be increased.
